

# DURHAM NEIGHBORHOODS PROJECT

- The project sponsor, the Durham Neighborhood Compass, visualizes public data pertaining to population demographics, community resources, and quality of life indices for Durham County.
- Data+ Durham Neighborhoods performed analysis on business and housing data with the purpose of visualizing neighborhood change.
- Images to the right exemplify the kind of housing data visualized, illustrating change in mean listing price of homes sold between 2010 and 2011.

sponsor John Killeen

# IMPACT AND NEXT STEPS

- Community stakeholders can utilize this work to understand and react to trends occurring across Durham. A particular motivation of mapping neighborhood change is to provide groundwork for community members attempting to visualize gentrification.
- A Shiny app currently in development will complement the current Compass interface, allowing users to engage in more interactive analysis.
